DETAILED ACTION

1. Claims 1-32 are pending.

Specification

2. The abstract of the disclosure is objected to because the sentence structure is not clear (e.g. line 2 "setting data every article"). Correction is required. See MPEP § 608.01(b).

Also, applicant is required to correct the entire body of the specification by incorporating proper sentence structure throughout (e.g. page 5, line 17 "setting data every article").

Claim Rejections - 35 USC § 103

3. Claims 1-32 rejected under 35 U.S.C. 103(a) as being unpatentable over Savage in view of either Cahlander et al., US 4,922,435; Cahlander et al., US 5,132,914 or Cahlander et al. US 5,172,328. Applicants remarks have been reviewed.

Savage shows a food predicting system. See previous Office Action.

Cahlander et al., US 4,922,435; Cahlander et al., US 5,132,914 or Cahlander et al. US 5,172,328 show a method for cooking food orders at peak and non-peak time periods using computer controlled command signals (e.g. columns. 2-3 and claims 33-36 of Cahlander et al. US 5,172,328).

To provide a method for displaying peak and non-peak order of food and computer controlled command signals for the food predicting system of Savage would have been obvious to one of ordinary skill in the art in view of either Cahlander et al., US 4,922,435; Cahlander et

al., US 5,132,914 or Cahlander et al. US 5,172,328. To do so would provide the well known option of using computer control command signals used in food systems.

4. Further references of interest:

Halverson, US 6,298,331, shows a computer dining management system.

Walker et al., US 6,298,331, shows an automated kitchen apparatus.

Teicher, US 6,102,162, shows an automated cafeteria system.

Cotter, US 4,797,818, shows a computerized food delivery/order system incorporating different time of day periods.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
